

would be relocated to the southern (upstream) end of the Canal. The box culvert under John Muir Drive also would be relocated and would cross under John Muir Drive close to the southern end of Impound Lake. The design of the diversion structure, box culvert under John Muir Drive, and Lake Merced Outlet would be approximately the same as for the proposed Project, but located at the upstream (southern) end of the Canal. The diversion structure would replace the first approximately 350 feet of the Canal, and the rest of the Canal would be unchanged except as needed for temporary construction access to the Lake Merced Tunnel Portal. Under the Canal Configuration Alternative, only one wetland cell of approximately 1.7 acres would be constructed. This alternative could be paired with either the proposed Tunnel improvements or the Tunnel Alignment Alternative.

The EPA notice of filing and availability of the Draft EIS was published on April 29, 2016, which opened the 60 day public review and comment period. The draft document was posted online at http://parkplanning.nps.gov/Vista_Grande, and printed copies were available on request. Daly City conducted one public meeting in Daly City on May 26, 2016. Responses to comments are provided in Chapter 3 of the Final EIS. Staff-initiated revisions to the text of the Draft EIS as well as revisions made in response to pertinent comments are provided in Chapter 4 of the Final EIS.

The NPS will execute a Record of Decision no sooner than 30 days following EPA's notice published in the **Federal Register** announcing filing and release of the Final EIS. The official responsible for approval of the Vista Grande Drainage Basin Improvement Project is the Regional Director of the Pacific West Region, and subsequently the General Superintendent, GGNRA, will be responsible for NPS implementation.
