

appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Certain employees of companies working under contract to EPA require access to TSCA confidential business information collected under the authority of TSCA in order to perform their official duties. The Office of Pollution Prevention and Toxics (OPPT), which is responsible for maintaining the security of TSCA confidential business information, requires that all individuals desiring access to TSCA CBI obtain and annually renew official clearance to TSCA CBI. As part of the process for obtaining TSCA CBI clearance, OPPT requires certain information about the contracting company and about each contractor employee requesting TSCA CBI clearance, primarily the name, Social Security Number and EPA identification badge number of the employee, the type of TSCA CBI clearance requested and the justification for such clearance, and the signature of the employee to an agreement with respect to access to and use of TSCA CBI. This information collection applies to the reporting activities associated with contractor personnel applying for new or renewed clearance for TSCA CBI.

Responses to the collection of information are voluntary but failure to provide the requested information will prevent a contractor employee from obtaining clearance for TSCA CBI. Respondents may claim all or part of a response confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 1.6 hours per response. Burden is defined in 5 CFR 1320.3(b).

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

Respondents/Affected Entities:

Entities potentially affected by this ICR are companies under contract to the Environmental Protection Agency to provide certain services, whose employees must have access to Toxic Substances Control Act (TSCA) confidential business information to perform their duties.

Estimated total number of potential respondents: 21.

Frequency of response: Annually.

Estimated total average number of responses for each respondent: 1.0.

Estimated total annual burden hours: 341 hours.

Estimated total annual costs: \$19,305. This includes an estimated burden cost of \$19,305 and an estimated cost of \$0 for capital investment or maintenance and operational costs.

III. Are there changes in the estimates from the last approval?

There is a decrease of 142 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease reflects a decrease in the number of contractor employees that need TSCA CBI clearance. This change is an adjustment.

IV. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

If you have any questions regarding the applicability of this action to a particular entity, consult the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

II. What action is the Agency taking?

In accordance with Executive Order 13777, titled *Enforcing the Regulatory Reform Agenda*, EPA solicited public comments on regulations that may be appropriate for repeal, replacement or modification as part of the President's Regulatory Reform Agenda efforts through docket [EPA-HQ-OA-2017-0190]. In addition, EPA issued several rules in 2017 to delay the effective date of the final certification rule including one issued on May 15, 2017 (82 FR 22294), that solicited public comment on a proposed 12-month delay of the effective date. Some of the comments received during that comment period included input on specific provisions of the revised Certification of Pesticide Applicators rule (82 FR 952; January 4, 2017) in addition to or instead of comments on the proposed 12-month delay of the effective date.

Through these efforts, EPA received comments on the minimum age requirements in the certification rule, which were discussed at the November 2, 2017, meeting of the Office of Pesticide Program's Federal Advisory Committee, the Pesticide Program Dialogue Committee (PPDC). A transcript of the PPDC meeting will be posted when available on EPA's website at <https://www.epa.gov/pesticide-advisory-committees-and-regulatory-partners/pesticide-program-dialogue-committee-meeting-5>.

After considering these comments, revisiting the record, and reviewing the applicable statutory authority, EPA has determined that further consideration of the rule's minimum age requirements is warranted through the rulemaking process. EPA is providing notice to the public that the Agency has begun the internal rulemaking process to address the minimum age requirements in the Certification of Pesticide Applicators rule at 40 CFR 171. EPA expects to

publish a Notice of Proposed Rulemaking in FY 2018 to solicit public input on these proposed revisions to the Certification of Pesticide Applicators rule.

EPA is also announcing that the implementation dates in 40 CFR 171.5 of the final rule published on January 4, 2017, for certifying authorities to submit revised certification plans, and for EPA to act on those plans remain in effect; EPA has no plans to change those implementation dates. Therefore, if a certifying authority submits its modified certification plan by March 4, 2020, the existing approved certification plan remains in effect until EPA has approved or rejected the modified plan or March 4, 2022, whichever is earlier.
