SUPPLEMENTARY INFORMATION:

Background

On April 7, 2006, we, NMFS, listed the southern distinct population segment (sDPS) of the North America green sturgeon (*Acipenser medirostris*) as a threatened species under the Endangered Species Act (ESA) (71 FR 17757). A recovery outline was completed in 2010. On January 9, 2018, we announced the availability of the Southern Distinct Population Segment of Green Sturgeon Draft Recovery Plan (Plan) in the **Federal Register** (83 FR 1025). The text of the Plan can be found here: http://www.westcoast.fisheries.noaa.gov/protected_species/green_sturgeon/green_sturgeon_pg.html. The Plan lays out a recovery strategy based on the best available science, identifies site-specific actions with time lines and costs, and includes recovery goals and criteria. Public comments on the Plan will be accepted through March 12, 2018. Details on how to submit comments can be found in our January 9, 2018 notice (83 FR 1025).

Recovery Plan Workshop Announcement

On March 5, 2018, NMFS will hold a public workshop at the NMFS office in Sacramento, CA to present the Plan. We invite any interested member of the public to attend. NMFS will present the details of the Plan and provide a time-limited question and answer period during which attendees may ask NMFS about the information presented. NMFS will provide a moderator to manage the workshop as well as a notetaker to document input received.

This workshop will be open to the public. If you plan to attend the workshop, please contact Joe Heublein at the address listed above by February 26, 2018, so we can ensure sufficient space for all participants. Please also plan to arrive at the workshop at least 30 minutes prior to the start time to allow time to clear the security screening checkpoint. The workshop is accessible to persons with disabilities. Send requests for sign language interpretation or other auxiliary aids at least five business days in advance to Joe Heublein at (916) 930–3719.

ADDRESSES:

Meeting address: The meeting will be held via webinar. The webinar is open to members of the public. Those interested in participating should contact Julie A. Neer at SEDAR (see **FOR FURTHER INFORMATION CONTACT**) to request an invitation providing webinar access information. Please request webinar invitations at least 24 hours in advance of each webinar.

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a multi-step process including: (1) Data Workshop, (2) a series of assessment webinars, and (3) A Review Workshop. The product of the Data Workshop is a report that compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The assessment webinars produce a report that describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The product of the Review Workshop is an Assessment Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion during the Assessment webinar II are as follows:

1. Using datasets and initial assessment analysis recommended from the in-person Workshop, panelists will employ assessment models to evaluate stock status, estimate population benchmarks and management criteria, and project future conditions.
2. Participants will recommend the most appropriate methods and configurations for determining stock status and estimating population parameters.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice

that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.
