Authority for This Rulemaking

The FAA's authority to issue rules
regarding aviation safety is found in
Title 49 of the United States Code.
Subtitle I, Section 106 describes the
authority of the FAA Administrator.
Subtitle VII, Aviation Programs,
describes in more detail the scope of the
agency's authority. This rulemaking is
promulgated under the authority
described in Subtitle VII, Part A,
Subpart I, Section 40103. Under that
section, the FAA is charged with
prescribing regulations to assign the use
of airspace necessary to ensure the
safety of aircraft and the efficient use of
airspace. This regulation is within the
scope of that authority as it would
establish Class E airspace extending
upward from 700 feet above the surface
at Chase Field Industrial Airport,
Beeville-Chase Field, TX, in support of
IFR operations at the airport.

**Availability and Summary of
Documents for Incorporation by
Reference**

This document proposes to amend
FAA Order 7400.11C, Airspace
Designations and Reporting Points,
dated August 13, 2018, and effective
September 15, 2018. FAA Order
7400.11C is publicly available as listed
in the **ADDRESSES** section of this
document. FAA Order 7400.11C lists
Class A, B, C, D, and E airspace areas,
air traffic service routes, and reporting
points.

The Proposal

The FAA is proposing an amendment
to Title 14 Code of Federal Regulations
(14 CFR) part 71 by establishing Class E
airspace extending upward from 700
feet above the surface to within a 6.7-
mile radius of Chase Field Industrial
Airport, Beeville-Chase Field, TX, to
accommodate new standard instrument
approach procedures. This action would
enhance safety and the management of
IFR operations at the airport.

Class E airspace designations are
published in paragraph 6005 of FAA
Order 7400.11C, dated August 13, 2018,
and effective September 15, 2018, which
is incorporated by reference in 14 CFR
71.1. The Class E airspace designation
listed in this document will be
published subsequently in the Order.

Regulatory Notices and Analyses

The FAA has determined that this
regulation only involves an established
body of technical regulations for which

frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.
