#### Animal and Plant Health Inspection Service

*Title:* Horse Protection Regulations.  
*OMB Control Number:* 0579-0056.

*Summary of Collection:* In 1970, Congress passed the Horse Protection Act (HPA, 15 U.S.C. 1821 *et seq.*), which was enacted to prevent showing, exhibiting, selling, or auctioning of “sore” horses, and certain transportation of sore horses in connection therewith, at horse shows, horse exhibitions, horse sales, and horse auctions. Soring is a process whereby chemical or mechanical agents, or a combination thereof, are applied to the limbs of a horse in order to exaggerate its gait. A “sore” horse is one that has been subjected to prohibited practices and, as a result, suffers, or can reasonably be expected to suffer, physical pain or distress, inflammation, or lameness when walking, trotting or otherwise moving. A horse that is “sore” is prohibited from entering or participating in HPA-regulated events because exhibitors, owners, and trainers of such horse may obtain unfair advantage over individuals exhibiting horses that are not “sore.”

*Need and Use of the Information:* To carry out the Act, the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA) administers and enforces the regulations in 9 CFR part 11. Part 11 delineates the responsibilities of horse industry organizations (HIOs), designated qualified persons (DQPs), management of regulated horse events, and persons who have control over regulated horses.

An HIO wishing to certify a program to license DQPs to inspect horses for compliance under the HPA must satisfy and abide by the requirements of the HPA and regulations. After requesting and receiving USDA certification from APHIS, HIOs must maintain an acceptable DQP program and recordkeeping systems. Managers and operators of HPA-regulated events may appoint and retain the services of DQPs to inspect and detect a horse that is sore or otherwise noncompliant with the HPA, and both managers and DQPs are required to provide and/or maintain certain information. Persons who own, train, show, exhibit, sell, transport, or

otherwise have custody of, or direction or control over any horse shown, exhibited, sold, or auctioned or entered for the purpose of being shown, exhibited, sold, or auctioned at any horse show, horse exhibition, or horse sale or auction must also satisfy and abide by the requirements of the HPA and regulations.

APHIS works with HIOs on an ongoing basis to oversee their performance under the HPA. Throughout the year, APHIS uses training sessions, conference calls, and open letters to HIOs, event managers, exhibitors, owners, trainers, custodians, and farriers involved in HPA-covered activities to provide communication and feedback to address issues and strengthen enforcement under the Act. Data collected throughout the year from within APHIS and from the HIOs and event management provide an account of the HIOs’ performance and progress toward eliminating the soring of horses and promoting fair competition. HIOs, through their certified licensing programs for DQPs, provide the primary means of detecting sored horses.

### **National Institute of Standards and Technology**

[Docket No.:190605485-9485-01]

#### **National Cybersecurity Center of Excellence (NCCoE) Securing Telehealth Remote Patient Monitoring Ecosystem**

**AGENCY:** National Institute of Standards and Technology, Department of Commerce.

**ACTION:** Notice.

**SUMMARY:** The National Institute of Standards and Technology (NIST) invites organizations to provide products and technical expertise to support and demonstrate security platforms for the Securing Telehealth Remote Patient Monitoring Ecosystem for the healthcare sector use case. This notice is the initial step for the NCCoE in collaborating with technology companies to address cybersecurity challenges identified under the healthcare sector program. Participation in the use case is open to all interested organizations.

**DATES:** Collaborative activities will commence as soon as enough completed and signed letters of interest have been returned to address all the necessary components and capabilities, but no earlier than September 30, 2019.

**ADDRESSES:** Letters of interest must be submitted to [HIT\\_NCCOE@nist.gov](mailto:HIT_NCCOE@nist.gov) or via hard copy to NIST, NCCoE, 9700 Great Seneca Highway, Rockville, Maryland 20850. Organizations whose letters of interest are accepted in accordance with the process set forth in the **SUPPLEMENTARY INFORMATION** section of this notice will be asked to sign a consortium Cooperative Research and Development Agreement (CRADA) with NIST. An NCCoE consortium CRADA template can be found at <https://www.nccoe.nist.gov/sites/default/files/library/nccoe-consortium-crada-example.pdf>.

**FOR FURTHER INFORMATION CONTACT:** Jennifer Cawthra via email at [HIT\\_NCCOE@nist.gov](mailto:HIT_NCCOE@nist.gov); by telephone, 240-328-4584; or by mail to NIST, NCCoE, 9700 Great Seneca Highway, Rockville, Maryland 20850. Additional details about the healthcare sector program are available at <https://www.nccoe.nist.gov/healthcare>.

**SUPPLEMENTARY INFORMATION:** Interested parties must contact NIST to request a letter of interest template to be completed and submitted to NIST. Letters of interest will be accepted on a first-come, first-served basis. When the use case has been completed, NIST will post a notice on the NCCoE healthcare sector Securing Telehealth Remote Patient Monitoring Ecosystem project page at <https://www.nccoe.nist.gov/projects/use-cases/health-it/telehealth> announcing the completion of the use case and informing the public that NIST will no longer accept letters of interest for this use case.

**Background:** The NCCoE, part of NIST, is a public-private collaboration for accelerating the widespread adoption of integrated cybersecurity tools and technologies. The NCCoE brings together experts from industry,

government, and academia under one roof to develop practical, interoperable cybersecurity approaches that address the real-world needs of complex information technology (IT) systems. By accelerating dissemination and use of these integrated tools and technologies for protecting IT assets, the NCCoE will enhance trust in U.S. IT communications, data, and storage systems; reduce risk for companies and individuals using IT systems; and encourage development of innovative, job-creating cybersecurity products and services.

**Process:** NIST is soliciting responses from all sources of relevant security capabilities (see below) to enter into a CRADA to provide products and technical expertise to support and demonstrate security platforms for the Securing Telehealth Remote Patient Monitoring Ecosystem. The full use case can be viewed at <https://www.nccoe.nist.gov/projects/use-cases/health-it/telehealth>.

Interested parties should contact NIST by using the information provided in the **FOR FURTHER INFORMATION CONTACT** section of this notice. NIST will then provide each interested party with a template for a letter of interest, which the party must complete, certify that it is accurate, and submit to NIST. NIST will contact interested parties if there are questions regarding the responsiveness of the letters of interest to the use case objective or requirements identified below. NIST will select participants who have submitted complete letters of interest on a first-come, first-served basis within each category of product components or capabilities listed below up to the number of participants in each category necessary to carry out this use case. However, there may be continuing opportunity to participate even after initial activity commences. Selected participants will be required to enter a consortium CRADA with NIST (for reference, see **ADDRESSES** section above). NIST published a notice in the **Federal Register** on October 19, 2012 (77 FR 64314) inviting U.S. companies to enter into National Cybersecurity Excellence Partnerships (NCEPs) in furtherance of the NCCoE. For this demonstration project, NCEP partners will not be given priority for participation.

**Use Case Objective:** The objective of this use case is to provide an architecture that can be referenced and guidance for securing a telehealth remote patient monitoring (RPM) ecosystem in healthcare delivery organizations (HDOs) and patient home environments, including an example solution that uses existing,
