This notice announces a public process for determining the scope of issues to be addressed, and for identifying the significant issues related to this action. This notice alerts the interested public of the scoping process, the potential development of a draft environmental impact statement, and to provide for public participation in that process.

SUPPLEMENTARY INFORMATION:

Background

The Council initiated this action to review and consider modifications to both the permitting system for *Illex* squid and the goals and objectives of the entire Atlantic Mackerel, Squid, and Butterfish Fishery Management Plan (FMP). In June 2017, the Council considered, but did not adopt, revisions to *Illex* squid permits as part of Amendment 20 to the FMP (December 14, 2018; 83 FR 64257). Since then, effort has increased and the fishery has been closed in both 2017 and 2018 after fully harvesting available *Illex* squid quota. Given recent fishery performance, the Council is evaluating if permitted access to the *Illex* fishery should be modified based on recent and historical participation. Existing FMP goals and objectives have not been revised since they were originally established in 1983. The Council is seeking input whether these goals and objectives are still appropriate for managing the Atlantic mackerel, squid, and butterfish fisheries or if they should be modified. More details may be found

in the Scoping Document (see **ADDRESSES** for how to obtain scoping document) and on the Atlantic Mackerel, Squid, and Butterfish page of the Council’s website at <http://www.mafmc.org/msb/>.

The scoping period is an important opportunity for members of the public to raise concerns related to the scope of issues that will be considered in the amendment. The Council needs public input to identify management issues, develop effective alternatives, and identify possible impacts to be considered. Public comments early in the amendment development process will help the Council address issues of public concern in a thorough and appropriate manner. Comments can be made during the scoping hearings or as described above (see **ADDRESSES**).

After this initial phase of information gathering, if the Council decides to proceed with the amendment the Council will evaluate potential management alternatives. The Council will then develop a draft amendment, incorporating the identified management alternatives, for public review. The Council will also prepare draft environmental analyses, as required by the National Environmental Policy Act, and provide those analyses for review and comment by the public as appropriate. Finally, the Council will choose preferred management measures for submission with the appropriate environmental analyses to the Secretary of Commerce to publish a proposed and then final rule, both of which have additional comment periods. While there are many opportunities for public comment in the process, this initial scoping comment opportunity is particularly important for assisting the Council in establishing the overall focus and direction of the amendment.

Scoping Hearings

Although the Council did not ultimately revise *Illex* squid permits as part of Amendment 20 to the FMP, the public provided scoping comments during the development of that action in response to a Notice of Intent published in the **Federal Register** on March 26, 2015 (80 FR 15991), which the Council considered as part of that action. To solicit further public comment on *Illex* squid permits and potential updates to the FMP objectives, the Council accepted additional comments at the following four meetings:
