50 CFR Part 648

[Docket No. 191007–0057]

RIN 0648–XX009

Fisheries of the Northeastern United States; Golden Tilefish Fishery; 2020 Specifications

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: We are implementing 2020 specifications for the commercial golden tilefish fishery, including the annual catch and total allowable landings limits. This action establishes allowable harvest levels and other management measures to prevent overfishing while allowing optimum yield, consistent with the Magnuson-Stevens Fishery Conservation and Management Act and the Tilefish Fishery Management Plan.

DATES: Effective November 1, 2019, through October 31, 2020.

FOR FURTHER INFORMATION CONTACT: Laura Hansen, Fishery Management Specialist, 978–281–9225.

SUPPLEMENTARY INFORMATION:

Background

The Mid-Atlantic Fishery Management Council manages the golden tilefish fishery under the Tilefish Fishery Management Plan (FMP), which outlines the Council’s process for setting annual specifications. Regulations implementing the Tilefish FMP appear at 50 CFR part 648, subparts A and N, which require the Council to recommend acceptable biological catch (ABC), annual catch limit (ACL), annual catch target (ACT), total allowable landings (TAL), and other management measures, for up to 3 years at a time. On September 7, 2017, we proposed 2018 specifications for the golden tilefish fishery and announced projected specifications for 2019 and 2020 based on Council recommendations (82 FR 42266). Public comment was accepted through September 22, 2017. We published a final rule implementing the 2018 specifications on November 7, 2017 (82 FR 51578).

On October 23, 2017, we published a proposed rule (82 FR 48967) to implement Framework Adjustment 2 to the Tilefish FMP (Framework 2), and accepted public comment through November 7, 2017. A final rule implementing Framework 2 was published on March 13, 2018 (83 FR 10803). One provision of Framework 2

changed how assumed discards are accounted for in the specifications setting process. As a result, the Framework 2 final rule adjusted the previously published 2018 specifications and projected specifications for 2019 and 2020. Additional background information regarding the development of these specifications was provided in these rules and is not repeated here. We published a final rule implementing the 2019 specifications on October 26, 2018 (83 FR 54055).

At the end of each fishing year, we evaluate catch information and determine if the ACL has been exceeded. If the ACL is exceeded, the regulations at 50 CFR 648.293 require a pound-for-pound reduction in a subsequent fishing year. During fishing year 2018 and thus far in fishing year 2019, there have been no annual catch limit or total allowable landings overages, nor is there any new biological information that would require altering the projected 2020 specifications. As a result, we are announcing the final specifications for fishing year 2020, as projected in the Framework 2 final rule (83 FR 10803; March 13, 2018), and in the final rule implementing the 2019 specifications (83 FR 54055) (See Table 1).

TABLE 1—SUMMARY OF GOLDEN TILEFISH SPECIFICATIONS

	2019		Final 2020	
	mt	million lb	mt	million lb
Overfishing Limit	1,098	2.421	1,039	2.291
ABC	742	1.636	742	1.636
ACL	742	1.636	742	1.636
Individual Fishing Quota (IFQ) ACT	705	1.554	705	1.554
Incidental ACT	37	0.082	37	0.082
IFQ TAL	705	1.554	705	1.554
Incidental TAL	33	0.072	33	0.072

As in previous years, no golden tilefish quota has been allocated for research set-aside. All other management measures in the golden tilefish fishery will remain unchanged for the 2020 fishing year. The incidental trip limit will stay 500 lb (226.8 kg), or 50 percent, by weight, of all species being landed, including tilefish; whichever is less. The recreational catch limit will remain eight fish per-angler, per-trip. Annual IFQ allocations will be issued to individual quota shareholders in mid-October, before the November 1 start of the fishing year.

The fishery management plan allows for the previous year’s specifications to remain in place until replaced by a subsequent specifications action (rollover provision). As a result, the 2019 specifications remain in effect until replaced by the 2020 specifications included in this rule.

Classification

Pursuant to section 304(b)(1)(A) of the Magnuson-Stevens Act, the NMFS Assistant Administrator has determined that this rule is consistent with the Tilefish FMP, other provisions of the

Magnuson-Stevens Act, and other applicable laws.

The Assistant Administrator for Fisheries, NOAA (AA) finds it is impracticable, unnecessary, and contrary to the public interest to provide for prior notice and an opportunity for public comment, pursuant to authority set forth at U.S.C. 553(b)(B). The proposed rule for Framework 2 (82 FR 48967, October 23, 2017) provided the public with the opportunity to comment on the projected specifications for 2019 and 2020, and the specifications for fishing year 2020 remain the same as projected in the Framework 2

rulemaking. All comments received were addressed in the respective final rule for Framework 2 (83 FR 10803, March 13, 2017). Similarly, the need to implement these measures in a timely manner for the start of the golden tilefish fishing year, constitutes good cause under authority contained in 5 U.S.C. 553(d)(3), to establish an effective date less than 30 days after date of publication. The public and fishing industry participants expect this action because we previously alerted the public in the proposed and final rules that we would conduct this review in interim years of the status quo multi-year specifications and announce the final quota prior to the start of the fishing year on November 1.

This final rule is exempt from review under Executive Order 12866 because this action contains no implementing regulations.

This final rule does not duplicate, conflict, or overlap with any existing Federal rules.

This final rule does not contain a collection of information requirement for the purposes of the Paperwork Reduction Act.

A final regulatory flexibility analysis (FRFA) was prepared for the 2018–2020 specifications final rule (83 FR 10803, March 13, 2017). That analysis included the potential impacts of the projected status quo specifications for 2019 and 2020, and no new information has arisen that would change the conclusions drawn in that previous analysis. Because advance notice and the opportunity for public comment are not required for this action under the Administrative Procedure Act, or any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, do not apply to this rule. Therefore, no new regulatory flexibility analysis is required and none has been prepared.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: October 8, 2019.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

[Docket No. 150818742–6210–02]

RIN 0648–XY045

Fisheries of the Economic Exclusive Zone Off Alaska; Pollock Fishery by Vessels Using Trawl Gear in the Western Regulatory Area of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting directed fishing for pollock by vessels using trawl gear in the Western Regulatory Area of the Gulf of Alaska (GOA). This action is necessary to prevent exceeding the 2019 Chinook salmon prohibited species catch limit established for vessels using trawl gear in the Western Regulatory Area of the GOA.

DATES: Effective 1200 hours, Alaska local time (A.l.t.), October 8, 2019, through 2400 hours, A.l.t., December 31, 2019.

FOR FURTHER INFORMATION CONTACT: Josh Keaton, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2019 Chinook salmon prohibited species catch (PSC) limit for vessels directed fishing for pollock using trawl gear in the Western Regulatory Area of the GOA is 6,684 Chinook salmon (§ 679.21(h)(2)(i)).

In accordance with § 679.21(h)(8), the Regional Administrator has determined

that the 2019 Chinook salmon PSC limit established for vessels directed fishing for pollock using trawl gear in the Western Regulatory Area of the GOA has been reached. Therefore, NMFS is prohibiting directed fishing for pollock by vessels using trawl gear in the Western Regulatory Area of the GOA.

Classification

This action responds to the best available information recently obtained from the fishery. The Acting Assistant Administrator for Fisheries, NOAA, (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such a requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay closing directed fishing for pollock by vessels using trawl gear in the Western Regulatory Area of the GOA. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of October 7, 2019.

The AA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

This action is required by § 679.21 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: October 8, 2019.

Jennifer M. Wallace,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
