SUPPLEMENTARY INFORMATION:

Background

The Great South Channel Habitat Management Area (GSC HMA) was created by the final rule to implement the New England Fishery Management

Council's Omnibus Habitat Amendment 2 (OHA2) (83 FR 15240; April 9, 2018). The use of all mobile bottom-tending fishing gear is prohibited in the GSC HMA. The GSC HMA contains complex benthic habitat that is important for juvenile cod and other fish species, and it is susceptible to the adverse impacts of fishing gear. The OHA2 included a 1year delay of the GSC HMA closure that allowed the surfclam fishery to continue fishing with hydraulic clam dredges in the GSC HMA. This delay was intended to give the Council time to determine if a long-term exemption is warranted. The 1-year delay ended on April 9, 2019, and the GSC HMA is now closed to all mobile bottom-tending fishing

On September 17, 2019, NMFS published in the Federal Register a proposed rule to implement the Clam Dredge Exemption Framework with a 30-day comment period that closed on October 17, 2019 (84 FR 48899). Full details of the proposed measures are provided in the proposed rule and are not repeated here. Subsequently, NMFS received a request from the Council to extend the comment period due to concerns that an error in a URL in the proposed rule may have prevented some individuals from submitting comments. NMFS is reopening the comment period on the proposed rule through November 18, 2019, and is including the correct URL to ensure all interested partied have an opportunity to submit comments. Comments submitted during the prior comment period have been incorporated into the public record, and will be fully considered during the preparation of our final determination.

Dated: October 25, 2019.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.
