

MDS

MUSIC DISTRIBUTION SYSTEM

The MDS Music Distribution System is designed to send music to individual auditoriums or conference rooms. The unit has been designed with the same high quality components and construction you have come to expect from USL, Inc.

Output modules capable of 4 mono or 2 stereo outputs
(26 stereo, 52 mono)

Modular construction for easy expansion and service

All outputs are transformer coupled to minimize hum and noise

Includes an internal fuse

Input and output levels are individually adjustable
Potentiometers are sealed for long-life reliability

Optional- Input levelers that adjust the input signal for
consistent sound levels independent of signal source

Compact 2-rack unit size compatible with
most audio sources (CD player, cassette deck, etc.)
