PROJECTION SYSTEM ANALYZER

The Academy Award winning PSA technology is further enhanced with the introduction of the PSA-200. The PSA-200 is capable of running on Microsoft Operating Systems XP and Windows 2000. This latest version now connects to your laptop via a USB port. Replacing the time-honored spot meter, the PSA greatly reduces the time and effort involved in adjusting your lamphouse.

Specifications

Luminance Ranges:
1-30 ft. L, 30-300 ft. L

Luminance Accuracy:
+5% +2 digits

Power Consumption:
4.5 W @ 12 VDC

Weight:
Approx. 23 lbs.

The PSA-200 analyzes and displays the luminance values of every part of the screen simultaneously

Measurements made via a video camera in the audience area or in the projection booth

All measurements can be saved in a report and printed for quality control reference

An optional feature permits the measurement of luminance for projection systems with three blade shutters

Optional software for image weave, jitter and flicker of film projectors

Measures luminance in terms of ANSI lumens for video projectors

The PSA-200 consists of a specialized video camera, tripod, cables, software and a sturdy lockable case
